 10. Admin
4. Phase 2 modules (workplace hub)
 1. Attendance (LAN check-in)
 2. Visitors & gate tags
 3. Communication Hub
 4. Whistle — anonymous reporting
 5. Doc Space & minute templates
 6. Shared Calendar
5. Security, roles & audit trail
6. Roadmap — what's next

1. What UCSCU Connect is — in plain words

UCSCU Connect is one web system that does the daily work of the Uganda Cooperative Savings and Credit Union (UCSCU) — the national umbrella body for SACCOs. Instead of paper files, Excel sheets, WhatsApp groups and a reception book, everything lives in one place with proper login access for staff, board members, SACCO users and even regulators like UMRA.

It runs in any browser (phone or computer), can work on the office LAN without internet, and keeps a complete audit trail of who did what — which for a cooperative is the difference between trust and suspicion.

2. How to sign in — demo users and roles

Every user has a role. Roles decide which pages and buttons you can see and use.

Username	Password	Role	What they can do
admin	admin123	Administrator	Everything: users, audit log, all modules
staff	staff123	UCSCU staff	Manage SACCOs, CFF, reports, trainings, visitors, spaces
board	board123	Board member	Approve CFF loans, vote on resolutions, read dashboards
kyaps	sacco123	SACCO user	Submit reports, apply for loans, pay dues, hub spaces, whistle
regulator	regulator123	UMRA/BoU observer	Read-only access to dashboards and exports

Login screen — demo accounts are listed on the page itself.

3. Phase 1 modules — apex operations

3.1 Dashboard

The first thing you see. It summarises the whole movement: how many member SACCOs, total individual members, CFF pool deposits, liquid balance, pending loans and orders, upcoming trainings, and a live activity feed. Administrators also see the audit trail of recent actions.

Dashboard — sector KPIs and recent activity.

3.2 SACCO Registry

- **Profiles:** every member SACCO with registration no., district, region, contact, member count, UMRA licence status and standing.
- **Dues:** annual invoices and payments, marked Paid / Partial / Unpaid, with MoMo/bank references.
- **Compliance calendar:** UMRA returns, audits, AGMs — each flagged Upcoming, Due soon, or Overdue.

Wazalendo SACCO	Reg. 9398	Kampala - Central	95,000	Licensed	Good	View →

SACCO Registry — filterable list with UMRA and standing badges.

3.3 Central Finance Facility (CFF)

- **Pool deposits:** SACCOs pool funds; total deposits, loans outstanding, invested, liquid balance shown live.
- **Inter-lending:** SACCO applies → staff review → **board approval** → disbursement → repayment. Role-enforced at each step.
- **Investments:** T-bills, fixed deposits with maturity tracking.
- **Liquidity alert:** red banner when the pool falls below the threshold (UGX 50M in this demo).

Central Finance — the pipeline, deposits and investments in one view.

3.4 PEARLS Supervision Reports

- SACCOS submit quarterly figures (savings, loans, assets, reserves, delinquency, cash, income, members).
- The system computes the WOCCU **PEARLS** ratios automatically: Protection, Effective structure, Asset quality (PAR), Rates of return (ROA), Liquidity, Signs of growth.
- Early-warning flags in red: PAR above 5%, liquidity under 10%, reserves under 10%, negative ROA, shrinking assets.
- Sector totals for advocacy and CSV export for regulators.

PEARLS sector view — distressed SACCOs surface immediately.

3.5 Training

Course catalogue with e-learning lessons, scheduled events (venue, dates, capacity, fee), SACCO registrations, attendance marking and certificate tracking — e.g. the Women's Mentorship Program run with ACCOSCA & CDF Canada.

3.6 Insurance (CIC Africa)

Policies held by SACCOs through the UCSCU-CIC joint venture: Loan Protection, Life Savings Cover, Asset Insurance, Fidelity Bond. Claims workflow: Submitted → Assessed → Settled / Declined.

3.7 Stationery Shop

UCSCU's branded books of accounts: passbooks, ledgers, receipt books, loan registers, share certificates, minute books. Stock management, ordering and fulfilment workflow; stock decreases automatically when an order is confirmed.

3.8 Announcements

Circulars targeted to all SACCOs or one region. In production this fans out by SMS (Africa's Talking/Twilio) and email to member SACCO contact persons.

3.9 Governance

Board/AGM/committee meetings with agenda, minutes, and resolutions voted electronically (for/against/abstain). Voting closes with a declared result (Adopted/Rejected). All votes and minutes are part of the cooperative's records.

3.10 Admin

User management (create accounts, set roles) and a complete, searchable **audit log** of every financial and administrative action.

4. Phase 2 modules — workplace hub

4.1 Attendance — LAN check-in

- **Check-in/out only works on the office LAN.** A public internet IP is rejected with a clear message. This works even when the LAN has no internet, because only the network matters.
- **Field check-in (exemption):** field officers and board members working off-site record their location; it is tagged "exemption" and audit-logged.
- **Lateness reason** field on check-in.
- **Leave/Permission workflow:** request → staff/board approve or decline → appears on the shared calendar.
- **Meeting attendance registers:** per-meeting sheets marking every system user present/absent.

Attendance & leave

LAN-gated check-in, leave & permission workflow, meeting registers

Check in / out (LAN only)

Lateness reason (optional)
e.g. traffic, prior engagement

Check in (LAN only)

Check out (LAN only)

Field / off-site exemption reason
e.g. field visit in Mbale

Field check-in (exempt)

Check-in/out only works when your device is on the office network. Field staff and board members use the exemption channel — all events are audit-logged.

My recent events

check in exemption 25 Aug 10:50 (field visit)

check in lan 25 Aug 10:50

Request leave / absence / late arrival

Leave

mm/dd/yyyy mm/dd/yyyy

Reason (e.g. medical, funeral, official duty)

Submit request

Leave & permission queue

Who	Kind	Dates	Reason	Status
System Administrator	Leave	2026-09-01 → 2026-09-05	annual	Approved

Meeting attendance registers

Meeting title mm/dd/yyyy Venue New register

Meeting	Date	Venue	Present
No registers created.			

Attendance — LAN check-in, exemption, leave queue and event log.

4.2 Visitors & gate tags

- Reception register with automatic numbered tags (T-001, T-002...).
- **Printable visitor pass** — a one-click page sized for printing at the gate.
- Host, purpose, items brought in, expected appointment flag; check-in/check-out with duration.

Visitors — who's on premises now and a printable gate tag.

4.3 Communication Hub

- Internal social feed with posts and threaded replies.
- **Spaces scoped by hierarchy:** general (everyone), ucscu-staff (staff+board), board-room (board+admin), sacco-leaders (SACCO leaders plus staff/board).
- SACCO users and regulators only see the spaces their role allows.

Hub — hierarchy-scoped spaces with threaded discussion.

4.4 Whistle — anonymous reporting

- Fraud, corruption, harassment, misuse of funds — filed with **no identity stored anywhere**.
- Reporter keeps a one-time **token** to check status: Open → Investigating → Resolved → Closed.
- The case queue is visible to oversight (staff/admin), not to the reporter's line manager.

4.5 Doc Space & minute templates

- Library of minutes, policies, speeches with ready templates: General meeting, Board meeting, AGM, Attendance register.
- **HR & conduct policy summary page** covering attendance rules, visitors, communication hierarchy and whistleblowing — a starting draft for formal adoption.

4.6 Shared Calendar

One view aggregating governance meetings, training events, UMRA deadlines and approved staff leave. Past items are flagged red; today is highlighted.

5. Security, roles & audit trail

- Role-based access on every route; SACCO users act only for their own SACCO.
- Full audit log of financial and governance actions — visible to administrators.
- Whistleblowing reports deliberately store **no user identity** — verified at database level.
- Attendance LAN gate is implemented in `app/routes/attendance.py` (set your office CIDR ranges in production).

6. Roadmap — what's next

- MTN MoMo / Airtel Money payments for dues and CFF repayments.
- SMS fan-out for announcements (Africa's Talking / Twilio).
- Document upload (licences, audits) to S3 storage.
- UMRA e-returns export format.
- PWA install (add to phone home screen) for an app-like experience.
